***Claim Rejections - 35 USC § 103***

1. Claims 1-5,7,8 are rejected under 35 U.S.C. 103(a) as being unpatentable over Strom '130.

See previous office action.

***Claim Rejections - 35 USC § 112***

2. Claims 35-38 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 35 and 37 call for a *method*. However, the claims from which they depend are apparatus claims.

***Allowable Subject Matter***

3. Claims 19-34,39,40 are allowed.
4. Claims 6,9-18 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
5. Claims 35-38 would be allowable if rewritten to overcome the rejection(s) under 35 U.S.C. 112, second paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.
6. **THIS ACTION IS MADE FINAL.** Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

The remarks made by applicant have been considered, however the above rejections are still deemed to be proper. The amendment to claim 1 calling for the external electrode to be adapted to transcutaneously receive energy from the patient is not supported by sufficient structure to define over the Storm device. Claim 1 calls for a 'medical pad' only, and does not include an apparatus that can sense energy from a patient. Further, applicant's specification does not state what modification to the electrode is done to make the electrode structurally different from common electrodes in the art, such as shown by Storm.
